

Sufiyan Ahmed S A

AI/ML Engineer | Generative AI | Backend Development

Shivamogga, Karnataka, India | +91 87490 21418 | saheaven786@gmail.com

Portfolio | LinkedIn | GitHub

Professional Summary

AI/ML Engineer focused on building practical Machine Learning and Generative AI applications. Hands-on experience developing RAG pipelines, LLM-powered tools, computer vision systems, and REST APIs. Proficient in Python, FastAPI, LangChain, prompt engineering, vector databases, and production-oriented application development.

Education

PES Institute of Technology and Management, Shivamogga

2022–2026

Bachelor of Engineering (B.E.) in Artificial Intelligence & Machine Learning

Relevant Coursework: Machine Learning, Deep Learning, Natural Language Processing, Computer Vision, Data Structures & Algorithms, Database Management Systems

Technical Skills

Programming: Java, Python, JavaScript, SQL

Computer Science: Data Structures & Algorithms, Object-Oriented Programming, Problem Solving, Complexity Analysis

Backend: REST APIs, FastAPI, Flask, Backend Development, API Design, Microservices

Databases: MySQL, SQL, MongoDB, Firebase

Systems & Tools: Redis, Docker, Git, GitHub, Linux

Cloud & Infrastructure: GCP, Kubernetes

Testing: Unit Testing, TDD

AI/ML: Machine Learning, NLP, Deep Learning, Computer Vision, PyTorch, TensorFlow, scikit-learn

Professional Experience

ERA Foundation (ComedKares Innovation Hub), Bangalore

Feb–May 2026

Data Science & AIML Intern

- Performed data preprocessing, exploratory data analysis, and visualization using Python, Pandas, NumPy, and Matplotlib.
- Developed and evaluated machine learning models including Logistic Regression, SVM, and KNN for predictive analytics.
- Built end-to-end data science solutions and maintained project workflows using Git and GitHub.

Webschedio Pvt. Ltd., Shivamogga

Mar–Jul 2024

Full-Stack Developer Intern

- Developed responsive web applications using React, HTML, CSS, and JavaScript.
- Integrated REST APIs and built reusable UI components for maintainable applications.
- Collaborated on application development and debugging, improving overall functionality and user experience.

Key Projects

Early Detection of Cardiovascular Disease – Final Year Project

2026

Technologies: Python, FastAPI, LSTM, IoT, Firebase

- Engineered an IoT-based wearable solution for real-time ECG, HRV, and SpO₂ monitoring with cloud integration.
- Applied an LSTM model to ECG data for cardiovascular risk prediction and connected the system to a FastAPI backend and live monitoring dashboard.

Research Paper Intelligence Platform

[GitHub](#) 2026

Technologies: RAG, LangChain, FastAPI, Vector Databases, LLMs

- Created a RAG-based research assistant that processes research papers and retrieves relevant context for LLM-powered question answering.
- Designed the retrieval pipeline with document processing, embeddings, vector search, and contextual response generation for research workflows.

AI Resume Analyzer

[GitHub](#) 2026

Technologies: Python, RAG, LLMs, Prompt Engineering, Resume Parsing

- Automated resume analysis by comparing candidate profiles with job requirements using LLM-based evaluation.
- Applied structured prompt engineering and contextual retrieval to generate relevant candidate insights for recruitment workflows.

Clipline – URL Shortener

[GitHub](#) 2026

Technologies: FastAPI, REST APIs, Redis, Docker, JSON Database

- Engineered a lightweight URL shortening service with FastAPI, REST endpoints, and a JSON-based persistence layer.
- Integrated Redis caching to optimize repeated URL lookups and containerized the application with Docker.

AI Career Buddy

[GitHub](#) 2026

Technologies: Python, REST APIs, Adzuna API, LLMs, Prompt Engineering

- Created an AI-driven job discovery platform that combines live Adzuna listings with personalized search workflows.
- Integrated external job APIs and LLM-based prompting to refine job discovery and generate career-oriented insights.

Prompt Testing & Evaluation Platform

[GitHub](#) 2026

Technologies: Prompt Engineering, LLM Evaluation, Python, JavaScript, Experiment Tracking

- Designed a prompt experimentation workbench for version-controlled and reproducible LLM testing.
- Added prompt versioning, datasets, evaluation runs, and complete run snapshots to support systematic prompt comparison.

Scam Email Detection System

[GitHub](#) 2025

Technologies: Python, Machine Learning, NLP, scikit-learn

- Engineered an ML-based email classification system for detecting phishing and scam messages.
- Applied NLP preprocessing and feature extraction techniques to prepare email data and trained classification models for threat detection.

Leadership & Activities

- Mentored 150+ students in AI/ML, web development, and project implementation.
- Conducted Full-Stack Development workshops for 60+ students and guided multiple hackathon teams.
- Coordinated IEEE technical events and supported planning, execution, and student participation.
- Served as Class Representative, coordinating academic and technical activities.
- Delivered 10+ AI/ML and software development projects end-to-end.

Certifications

2025	AI Foundations – Simplilearn SkillUp
2025	Machine Learning using Python – Simplilearn SkillUp
2024	Machine Learning Specialization
2024	Generative AI Workshop – NxtWave
2021	Hardware & Networking – Sri Sharada Neoway Academy
