🔗 [Sufiyan-2003](#)

Professional Summary

AIML graduate with experience in Machine Learning, Deep Learning, Computer Vision, and Backend Development. Skilled in building AI-powered applications, REST APIs, and end-to-end software solutions using Python and modern AI frameworks.

Education

PES Institute of Technology and Management

Shivamogga

Bachelor of Engineering (B.E.) in Artificial Intelligence & Machine Learning

2022–2026

Relevant Coursework: Machine Learning, Deep Learning, Natural Language Processing, Computer Vision, Data Structures & Algorithms, Database Management Systems

Technical Skills

Programming: Python, Java, JavaScript, Go-Lang, C, SQL, Object-Oriented Programming (OOP)

Data Science: NumPy, Pandas, Matplotlib, Seaborn, Data Preprocessing, Exploratory Data Analysis (EDA), Feature Engineering

Machine Learning: scikit-learn, Linear & Logistic Regression, Decision Trees, Random Forests, Support Vector Machines (SVM), K-Nearest Neighbors (KNN), XGBoost, Model Evaluation

Deep Learning: TensorFlow, PyTorch, Neural Networks, Convolutional Neural Networks (CNNs), LSTM

NLP & LLMs: DistilBERT, Tokenization, Text Classification, Large Language Models (LLMs)

Computer Vision: OpenCV, YOLOv8, Image Processing, Object Detection, PaddleOCR, Feature Extraction

Web & APIs: Flask, FastAPI, REST APIs, Backend Development, Model Serving

Databases: MongoDB, MySQL, Firebase

Cloud & DevOps: Docker

Tools: Git, GitHub, Streamlit

Professional Experience

ERA Foundation (ComedKares Innovation Hub)

Bangalore

Data Science & AIML Intern

Feb–May 2026

- Performed data preprocessing, EDA, and visualization using Python, Pandas, NumPy, and Matplotlib.
- Developed and evaluated ML models including Logistic Regression, SVM, and KNN for predictive analytics.
- Built end-to-end data science solutions and managed version control using Git and GitHub.

Webschedio Pvt. Ltd.

Shivamogga

Full-Stack Developer Intern

Mar–Jul 2024

- Developed responsive web applications using React, HTML, CSS, and JavaScript.
- Integrated REST APIs and enhanced application performance and user experience.
- Built reusable UI components, improving development efficiency and maintainability.

Key Projects

Early Detection of Cardiovascular Disease - Final Year Project

2026

Technologies: Python, FastAPI, LSTM, IoT, Firebase

- Developed an IoT-based wearable system for real-time ECG, HRV, and SpO₂ monitoring.
- Built an LSTM model using ECG data for cardiovascular risk prediction.
- Developed a FastAPI backend and health dashboard for live monitoring.

AI Smart Traffic Control System [GitHub](#)

2026

Technologies: Python, YOLOv8, OpenCV, FastAPI

- Developed an AI-based traffic system for emergency vehicle prioritization.
- Implemented real-time vehicle detection using YOLOv8 and OpenCV.
- Automated signal control to reduce emergency response delays.

Image Steganography Web App [GitHub](#)

2025

Technologies: Flask, Cryptography

- Implemented AES-encrypted image steganography for secure communication.
- Added PSNR-based image quality validation.
- Developed a lightweight web interface for message encoding and decoding.

Scam Email Detection System [GitHub](#)

2025

Technologies: Python, Machine Learning, NLP, scikit-learn

- Developed an ML-based system to identify phishing and scam emails.
- Applied NLP techniques for email preprocessing and feature extraction.
- Trained classification models to improve email threat detection accuracy.

AI Based Hiring System [GitHub](#)

2025

Technologies: Python, Flask, Machine Learning, SQL, Docker

- Automated candidate screening and resume analysis using ML.
- Generated candidate scores based on predefined hiring criteria.
- Built REST APIs for recruiter interactions and management.

Real-Time AQI Monitoring System [GitHub](#)

2025

Technologies: Flask, JavaScript, WAQI API

- Developed a GPS-enabled AQI tracking dashboard.
- Visualized live air quality trends using interactive charts.
- Integrated real-time environmental monitoring APIs.

Leadership, Achievements Mentorship

- Mentored 150+ students in AI/ML, web development, and project implementation.
- Conducted Full-Stack Development workshops for 60+ students and guided multiple hackathon teams.
- Served as Class Representative (CR), coordinating academic and technical activities.
- Delivered 10+ AI/ML and software development projects end-to-end.

Certifications

2024: Machine Learning Specialization

2024: Generative AI Workshop – NxtWave

2021: Hardware Networking
